

My name is Kris Beckett and I am writing to express my opinion concerning National Association of Broadcasters push to keep satellite radio from broadcasting local weather and traffic information. I pay for these services for a reason. I travel a lot and often cannot find this information when I am in an unfamiliar city any other way. It should not be up to the NAB to determine what my money pays for. I respectfully urge you to reject the NAB's petition 04-160.
